

The Master Gardener program is an all-volunteer organization sanctioned by Land Grant institutions in each state and functions as an extension of the college or university. In Wisconsin, the program is sponsored by the University of Wisconsin-Extension. Master Gardeners are trained volunteers who work with University of Wisconsin-Extension staff to help people in the community better understand horticulture and their environment.

## Washington County MG Core Projects

**West Bend Farmers Market** - opportunity to answer questions on gardening and share information on current plants, diseases and invasive species.

**Germantown Community Gardens** - to give members of the local community the opportunity and space to increase the availability of fresh produce for themselves and their families.

**Washington County Fair** - opportunity to help answer those tough questions regarding gardening, lawn care, trees/shrubs, flowers, fruits, vegetables and more!

**West Bend Community Gardens** - The purpose of this garden is to educate the community in gardening practices, offer assistance to other gardeners, demonstrate a variety of gardening techniques, and provide fresh vegetables to a local food pantry.
